

Derrick Ng

(858) 625-1251 | ngzhewee@berkeley.edu | www.linkedin.com/in/ngzhewee

EDUCATION

Master of Engineering, Artificial Intelligence | GPA: 3.78 Expected Dec 2026

UCLA Samueli School of Engineering | Los Angeles, CA

- *Relevant Coursework:* Artificial Intelligence, Large-Scale Data Mining, Neural Networks & Deep Learning, Natural Language Processing, Automated Reasoning

Bachelor of Arts, Computer Science | GPA: 3.64

May 2025

University of California, Berkeley | Berkeley, CA

SKILLS

Programming & Tools: Python, SQL, REST APIs, Git, Docker, GCP, MySQL

Machine Learning: scikit-learn, PyTorch, Transformers, Multimodal Fusion, CNNs, LSTMs

NLP: Hugging Face, LLM Fine-Tuning (SFT, LoRA), Text Embeddings (BERT, BGE), Sentiment Analysis

Agentic AI: LangGraph, Multi-Agent Systems, OWASP-Aligned AI Security

Languages: English, Mandarin Chinese

PROFESSIONAL EXPERIENCE

Agentic AI Engineer

June 2026 – Aug 2026

iDox.ai (UCLA Samueli Industry Capstone) | Los Angeles, CA

- Built a LangGraph Policy Agent for a multi-agent refund workflow, integrating Azure OpenAI via REST APIs to produce confidence-scored, Pydantic-validated decisions grounded in retrieved policy evidence
- Implemented OWASP-aligned governance controls at agent handoffs to detect tool misuse, semantic drift, and PII leakage, surfacing risks in a dashboard for human review
- Developed a GCP/MySQL evaluation harness for 20 routine, edge-case, and adversarial refund scenarios, validating workflow reliability through structured audit logs and token-usage tracking

Venture Capital Analyst Intern

May 2025 – Sept 2025

Jinding Capital | Shanghai, China

- Researched Edge-AI SoCs, XR/spatial-computing chips, DPUs/SmartNICs, and sparse accelerators to inform investment thesis development across AI infrastructure
- Conducted technical due diligence on AI semiconductor targets by validating management claims through expert interviews, architecture review, benchmark data, and ecosystem analysis to assess technical defensibility
- Presented VC investment memos on AI semiconductor targets, evaluating commercial viability, competitive positioning, and investment fit for investment committee discussion

Research Assistant

Jun 2024 – August 2025

Co-Design Lab, UC Berkeley | Berkeley, CA

- Built a database of 23,000+ Amazon reviews from 290 sustainability-certified products using automated scraping and a 164-keyword sustainability dictionary across 16 aspects for scalable user-insight extraction
- Developed an NLP workflow using product-feature extraction, aspect-based BERT/GPT sentiment analysis, and LDA topic modeling to structure noisy reviews into design-relevant evidence
- Generated LLM-based sustainable design leads from review-derived context and validated outputs through manual evaluation with correlation analysis for an ASME IDETC-CIE 2025 conference paper

Research Assistant

Jan 2025 – May 2025

Squishy Robotics | Berkeley, CA

- Built a dataset of 540 wildfire sequences from the Corsican Fire Database, pairing cleaned RGB/NIR images with LLM-augmented textual descriptors and computed ground-truth targets for a standardized wildfire-forecasting benchmark
- Implemented a late-fusion multimodal forecasting prototype with EfficientNet-B0, BERT, Transformer fusion, and LSTM regression, reducing validation error by 84% while predicting decomposed fire-progression attributes for explainable wildfire forecasting

Web Development Engineer Intern

Sept 2023 – Dec 2023

AoSheng Global Inc. | El Monte, CA

- Built a full-stack education-consulting website using Next.js/React, designing student-facing navigation and SEO-oriented page architecture to support marketing-driven traffic acquisition
- Designed AWS-backed enterprise data workflows to consolidate fragmented consulting operations into a standardized system for student lifecycle management
